I-70 Bethune & Burlington Improvement Project Newsletter

Weekly Traffic Impacts and Work Update

April 29 to May 5

Crews have completed the paving of the two detour crossings. One, just west of Bethune between Mile Points 426-427 and the other, closer to Burlington, near MP 436.

This week preparation for head to head traffic continues on eastbound I-70 between Bethune and Burlington (MP 426 to 436)

There is a 24 hour, 7 day per week left lane closure on eastbound I-70 from MP 426 to 436 for the foreseeable future.

Project Schedule

- The roadway shall remain open while improvements are being made.
- No delays are expected.
- During paving operations in the first phase, traffic will be shifted to a head-to-head configuration on one side of I-70 with single-lane traffic in both directions.
- The speed limit will be reduced during work hours and all other times through the work zone

Traffic Impacts

- The roadway shall remain open while improvements are being made.

- During paving operations in the first phase, traffic will be shifted to a head-to-head configuration on one side of I-70 with single-lane traffic in both directions.
- The speed limit will be reduced during work hours and all other times through the work zone

About the Project

The Colorado Department of Transportation will begin a highway improvement project on March 25 on Interstate 70 from Bethune, west of Burlington, to the Kansas state line.

Improvements will be made in both the eastbound and westbound lanes from Bethune to Burlington and the westbound lanes of I-70 from Burlington to the Kansas state line.

The first phase of the project will consist of constructing two detour crossings, resurfacing east and westbound lanes of I-70, some shoulder reconditioning, rehabilitation of two bridges, and upgrading emergency median crossovers, traffic signage, delineators, striping and guardrails. This work will occur in a nine-mile stretch from Mile Point 427 near Bethune to MP 436 at Burlington.

In the next phase, crews will resurface an eleven-mile portion of westbound I-70 from MP 438 near Burlington to MP 449.6, the Kansas state line. Additionally, guardrails, delineators and striping will be upgraded along this stretch of interstate. Simon Contractors, of Cheyenne, Wyoming, is the contractor for this project.

This project will improve and prolong the life of the road surface as well as providing a variety of improvements that will enhance safety. Resurfacing can greatly extend the life of the asphalt pavement. Some highways may last more than 50 years with periodic resurfacing of the top layer of asphalt and timely repairs.
